

GIBA Statement in Response to the Review of Air Transport Licensing Policy Letter, dated 11th June, 2018

From: David Oxburgh, Chairman of the Guernsey International Business Association (GIBA)

GIBA welcomes the changes proposed by the Committee for Economic Development to Air Transport Licensing. The move to an "open skies" policy for all other than the Gatwick and Alderney routes is a very definite step in the right direction.

We agree with the Committee's view that funding should be provided to support routes which would not otherwise be started or sustained and hope that the Committee's proposals in this regard are approved by the States in July, so that the vital work to strengthen our air links, making them more reliable and affordable, can progress quickly.

The Review of Air Transport Licensing Policy Letter can be found [here](#).
