

GIBA Statement on Electricity Strategy Debate

7 September 2023

GIBA understands the urgency for the States of Guernsey to act decisively in the matter of the island's electricity strategy, which is critical to the long-term economic wellbeing of Guernsey, including the financial services industry, the backbone of our economy. GIBA understands that Deputies should also be mindful of affordability, security and evolving trends in sustainable and responsible energy measures and will seek to factor these in proportionately to their decision-making in order to retain Guernsey's credibility on a wider global stage.
